

To the FCC,
Satellite radio is one of the greatest thing to come along. I get to listen to what I want and not be interrupted by all the comercialization that has bbombarded the FM broadcasts. Though sat. traffic and weather has not yet reached my area, I am in great support of this choice. Why is the NAB so interested in taking these services away?? We pay to listen to what we choose too. This should be our right. PLEASE REJECT THE NAB's PETITION 04-160. So we may enjoy our own choices.

Regards,
Judy Taylor
